## COMPOSITION CHART

## ALUMINIUM COMPOSITE PANELS ( ACP )

Aluminium Composite panels are sandwich panels comprising two Aluminium sheets bonded to a non-Aluminium core. It is widely used as a very popular building cladding material for modern buildings. Its seamless finish imparts a very contemporary look to the buildings available in thickness from 2 MM to 6 MM max. they are specialized for Metal based, Light weight, Easy to Install, Design Flexibility, Eco Friendly, Weather Resistant, Termite Proof, Durability, UV Resistant, available in wide Range of Colors & Patterns, Easy to clean, Fully Recyclable & Swelling or Shrinkage Free.

## HIGH PRESSURE LAMINATES ( HPL )

HPL, is the best replacement of wood & Marble being used for exterior of our home and commercial buildings. It is considered to be the one of the most durable decorative surface material and its available with special performance properties powered by research & development team. Recently, we developed Metal Based HPLs with 6 MM thickness which is perfectly suitable for extreme & completely unpredictable Indian weather. These Metal based HPLs are getting widely used in miscellaneous fields due to its excellent mechanical & physical performance making it as one of the most popular material in various application areas.
